40

ABSTRACT OF THE DISCLOSURE

A method and system automatically providing responses to a
5   recipient stores data relating to the recipient in a data store,
the data being gatherable from one, some or all of written
communications, mail, telephone, the Internet, servers, telephone
voice, data and text messages, and other files and data sources.
An initial automatic communication is formed, and passed to a
10   modifying console for possible modification to form a final
communication. Modifications can include: doing nothing;
deleting material; adding new material; adding material of
predetermined fixed content; adding material of
predetermined alterable content; and altering material. The
15   final communication can be provided on one, all or some of the
Internet, servers, the telephone system in the form of text,
voice and data messages, and as mail for posting or mailing. The
final communication can be in a selectable language, for a
selectable jurisdiction and in a selectable idiom.
